

## CAPTURING ESSENTIAL DATA WITH OUR SCANNERS

**SCANNERS – AN ESSENTIAL ELEMENT IN MAKING TRACEABILITY POSSIBLE**

Traceability is the key element in keeping track of individual products or stock keeping units (SKUs). Delivering this stock into the hands of consumers efficiently is made possible by the use of barcode scanners.

Traceability Solutions provides a wide variety of reliable scanners to meet diverse capturing needs. From fixed-mounted to mobile scanners with Bluetooth connectivity, our scanners are able to operate under a wide variety of conditions.

### DS3600

The DS3600 Series Ultra-Rugged Barcode Scanners offer indestructible design and advanced scanning technology, perfect for your warehouse or manufacturing plant.

#### Features

1D and 2D versions of the 3600 series are available with tethered and cordless options for fast, accurate performance in picking, packing, shipping, receiving, work in progress (WIP), inventory tracking, track and trace, cross docking and point of sale (POS) applications  
Built to perform in extreme conditions, the ultra-rugged scanner series offers the industry's highest drop, tumble and sealing specifications in its class and is the industry's first IP67-rated scanner capable of enduring complete water immersion for up to 30 minutes  
Zebra's 3600 series offers industry-leading scan performance on 1D and 2D bar codes - whether it is a high-density barcode, displayed on the screen of a mobile phone, under heavy shrink-wrap or printed on paper and damaged or dirty  
Available with Zebra's PowerPrecision+ smart battery technology which offers a first-in-its class charge gauge for visibility into battery power, users can monitor battery age and ability to hold a charge – ensuring only healthy batteries are used

### DS457

The DS457 fixed-mount imager is specifically designed for standalone applications and OEM (original equipment manufacturer) applications such as kiosks. The imager is extremely compact, provides easy and flexible integration of barcode imaging into a host device. Offering high-performance imaging on 1D and 2D barcodes, the DS457 is ideal for medical instruments and manufacturing applications.

#### Features

- Omni-directional scanning
- Rugged design withstands multiple 76cm drops to concrete
- Flexible and easy to integrate
- Fits into the smallest of spaces
- Extraordinary scanning speeds on any surface

## DS3508

The DS3508 series of rugged, tethered omnidirectional digital scanners bring comprehensive, high-performance data capture to harsh industrial environments. Engineered with breakthrough digital imaging technology, this scanner family delivers extremely fast and accurate data capture of 1D and 2D barcodes, images and direct part marks (DPM) as well as supporting Item Unique Identification (IUID).

### Features

- Unique aiming pattern
- Ability to capture high-density barcodes
- Exceptional motion tolerance
- Omni-directional scanning
- Multiple on-board interfaces and universal cable set
- Rugged design withstands multiple 2m drops to concrete
- Advanced data formatting supports RSM (Remote Scanner Management)

## DS3578

The DS3578 is a series of cordless, rugged, omnidirectional digital scanners with integrated Bluetooth technology which provides cordless freedom and improved productivity. This scanner range delivers extremely fast and accurate data capturing of 1D and 2D barcodes, images and direct part marks (DPM). This series of scanners supports Item Unique Identification (IUID). The DS3578 series is available in a number of models including a standard version, a high-density version and a version supporting direct part marks (DPM), IUID support and image capture/transfer.

### Features

- Unique aiming pattern - bright central laser dot ensures quick, accurate scanning
- Cordless scanning enables real-time barcode data collection, reducing repairs from cable failure
- Ability to read a wide variety of DPM marks
- Advanced data formatting eliminates costly modifications to the host software

## MC9200

The Zebra MC9200 is a rugged and powerful scanner with a higher resolution display, better scanning performance and more scanning options than its predecessors. It processes information quickly and accurately in the harshest of environments.

### Features

- Durable shock resistant housing and touchscreen design
- Faster processing improves application performance and user productivity
- Increased memory vastly improves application processing speed
- Latest mobile operating system includes increased flexibility, interoperability and security

## MC67

Give your field workforce the tools they need to work faster and smarter with the rugged MC67 Series. This fully-featured device lets workers access information in your backend system; scan practically any barcode in almost any condition; capture documents to simplify recordkeeping; take and send video and photos for real-time repair support, and call a customer with an arrival window.

### Features

- High-speed cellular & Wi-Fi wireless connections
- Advanced scanning technology
- Automatically powers down when it is not in use
- Rich photographic intelligence
