

CUSTOM DIES AND BRANDERS

Traceability Solutions offers customers the flexibility to customise special dies or hand stamps to meet their specific needs. All sizes, characters, styles, logos, fonts, etc. can be manufactured to your specific needs, and on a variety of materials from high speed steels, to specialised brass for product branding.

CUSTOMISED HAND STAMPS & DIES

Customise your hand stamp to suit your needs.

Stamp impressions onto the following materials:

- Wood
- Metal
- Plastic
- Leather
- Soft ceramics
- Unhardened steel, as well as many other types of materials

CUSTOM METAL HAND STAMPS

Deliver high quality marks every time with your customised design. Whilst other marking methods may involve expensive lasers or hazardous chemicals, a Hand Stamp is the most cost-effective and easiest DIY permanent marking solution.

Hand-held stamps provide sharp, deep and clear impressions. The textured steel type provides for an easy grip with less slipping. All special dies are available for hand and machine applications and are manufactured to the highest standard in a variety of materials including:

- Vacuum heat treated K110 tool steel
- Brass
- Aluminium and more

BRANDING IRON INSERTS AND DIES

Branding irons offer a quick and easy way to brand items such as tyres, plastics and wood with alphanumeric information, inventory numbers or customised to suit your needs. Ten digits, from 0-9 on one solid head or a T-Slot is available so that you can customise your mark. The solid head or T-Slot is heated and kept hot by the powerful internal heating element, which in turn creates the heat to brand the mark.

The key features of the branding irons include:

- Available in quarter (6mm), half (12mm) and one inch (25mm) characters
- The branding iron is rugged and is built to last

Built in stand supports ensure that the branding head is supported during heat up and when standing idle.
